

# AQUAPOD 12 GALLON EXCHANGE PROGRAM

## IMPORTANT SAFETY RECALL INFORMATION

Aquapod 12 Gallon Model #7050 Product Exchange Program.

In cooperation with the U.S. Consumer Product Safety Commission (CPSC), Current USA, Inc. is voluntarily recalling Aquapod 12 gallon aquarium systems (Model #7050) that were sold in the USA from December 2005 through January 2006. These aquariums were imported from China.

The affected Aquapod aquariums could have a potential electrical risk resulting in the inability to independently operate each lamp. In the event the user plugs only one of the two power cords into an AC outlet, it may energize the remaining cord and present an electrical hazard resulting in shock. Current USA has received nine consumer reports of these lighting systems not working correctly. If you have a recalled Aquapod, please stop using it and order a replacement tank immediately. This recall only affects Model #7050 with no serial number, other models including Current Models #7051 & #7052 are not affected.

Current USA has initiated a domestic exchange program and will provide eligible customers with a new Aquapod 12 gallon system free of charge through their local retailer.

The recalled Aquapod systems include those with no serial number. To view the serial number, open the lid and locate the serial number located on the bottom left corner of the light reflector. The serial number is printed in black numbers.

Note: If your Aquapod 12 gallon system does have a serial number, you do not have to exchange it. This recall does not affect other models.

Pet stores nationwide, catalogers and online retailers sold the Aquapod tanks from December 2005 to January 2006 for a suggested retail of US\$240.

If you have recently purchased an Aquapod, please check the outside box and locate the serial number next to the barcode. If a serial number exists, it is unaffected by this recall.

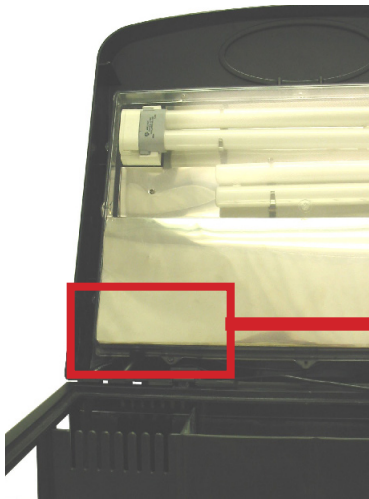

Consumers should stop using the recalled Aquapod aquarium and contact their dealer for a replacement tank. For more information, consumers should call Current USA Inc. at (866) 276-8872 between 9 a.m. and 4 p.m. PST Monday through Friday.

# THE EXCHANGE PROCESS

## IDENTIFYING YOUR AQUAPOD

The recalled Aquapod tanks include Model #7050 12-gallon systems that have no identifying serial number. Serial numbers are located both on the outer box next to the barcode, and on the inside of the lid. To view the serial number, you must lift the lid up and look at the reflector. The serial number is printed in black on the reflector. Please use the diagram below to identify if your Aquapod is being recalled.

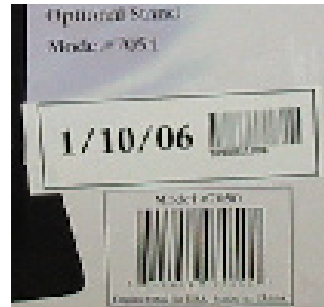

Serial number should be located here. If your tank does not have a serial number, it is being recalled. If a serial number is present, it is **NOT** affected by this recall.

Note: if your 12-Gallon Aquapod has a serial number on the reflector or on the box, it is **NOT** being recalled.

## REPLACEMENT INSTRUCTIONS:

Please contact your retailer for confirmation that your replacement tank is in stock. Complete the above information and DISCONNECT all power to your tank. Either return the entire Aquapod #7050 system or the two lighting cords where the cords exit the lid behind the tank. (see below.) Return both cords or tank and this completed form to your retailer for a replacement Aquapod\*. Upon receipt of your new Aquapod, the recalled product must be destroyed to prevent the possibility of further hazards.

### 1. DISCONNECT AND UNPLUG ALL POWER CORDS.

### 2. CUT UNPLUGGED POWER CORDS NEAR THE TANK LID.

**WARNING: DISCONNECT AND UNPLUG ALL POWER CORDS**

### STEP 3 : RETURN CUT POWERCORDS OR ENTIRE DEFECTIVE TANK WITH WARNING STICKERS AND THIS FORM TO YOUR DEALER FOR A REPLACEMENT TANK.

For more information, consumers should call Current USA Inc. at (866) 276-8872 between 9 a.m. and 4 p.m. PST Monday through Friday.
