

# STEP UP TO THE POD

• **THE AQUAPOD** offers all-in-one elegance with a new standard of performance. The modern style compliments any décor and features seamless front rounded glass corners for optimum viewing. The contrast of the black back will highlight the vibrant colors of fish, invertebrates and plants. Hidden under the sleek canopy you'll find a sophisticated lighting system that screams with performance and efficiency - It features two Dual Color SunPaq compact fluorescent lamps, an internal electronic driving system and Nocturnal Blue Lunar Lights to complete the 24-hour lighting cycle. Combine all of this with our ultra-efficient surface skimming filter and it is quite simply a system we are proud to call AquaPod.

#7051  
SHOWN

- **THE UNDERWATER PERSPECTIVE** - The seamless rounded front corners provide a panoramic view of your aquatic creatures. The thick high quality glass is bent and seamed with unparalleled precision while the reinforced tank frame provides optimum tank support. All this to provide the perfect viewing portal to your underwater garden.
- **BLISTERING LAMP PERFORMANCE** - The ultimate lighting spectrum is achieved by utilizing two Dual SunPaq lamps - which combined with the SunPaq driving system produces over 50% more lumen output than comparable systems. Using a proprietary blend of Nichia phosphors, the dual phosphor technology produces eye popping color rendering, while providing the necessary lumen output for high coral growth. Polished reflector pumps up the light output while a polycarbonate splash lens protects the lamps and ballasts from corrosion.

## WHAT'S INCLUDED:

Each AQUAPOD includes tank, surface skimming filtration system, SunPaq lamps, cooling fan, Nocturnal Blue Lunar Lights, mechanical sponge filter, submersible pump with flat nozzle and complete instructions. AQUAPODS are double boxed to reduce stress in shipping.
