

NIGHT SHIFT

STIMULATES SPAWNING
LINKABLE
LOW WATTAGE CONSUMPTION
3 COLOR CHOICES

When the day is done, the Lunar Light begins its work. By casting a beautiful moon glow over your tank or terrarium it illuminates the previously unseen nocturnal environment and it promotes spawning, all while consuming less than 1 watt of power. Install Lunar Lights for a brilliant system that helps you enjoy an active night life.

LUNAR LIGHT™ Nocturnal Simulator

BY THE LIGHT OF THE MOON

Create the ultimate moonlight effect with Lunar Light. Research studies have shown that using rhythmic moon luminance is very helpful in spawning captive animals. Add it to your existing hood or canopy for a complete 24-hour lighting solution. For optimum coverage, add Lunar Links (sold separately) every 2 feet inside your canopy.

Our **Moon White** is the only natural white light replicating the glow of a full moon. The crisp white light casts a 'moon-glow' over your tank creating a beautiful nocturnal environment.

View the nocturnal habits and feeding of reptiles without disturbing their night environment with the **Reptilian Red** light. This casts a "non-visible (to reptiles) light" over your terrarium creating a viewable nocturnal environment.

The **Nocturnal Blue** light casts a mysterious nighttime glow over your tank creating a viewable nocturnal environment while providing all the benefits of a Lunar Light.

APPLICATIONS

Our Moon White is ideal for use in all freshwater, saltwater and reef tanks to simulate the lunar glow of a full moon on a summer tropical night, and is also great for terrarium use. Reptilian Red is ideal for use in all terrariums to promote and view nocturnal activity. And our Nocturnal Blue is ideal for use in all freshwater, saltwater and reef tanks by creating a mysterious nighttime glow for nocturnal viewing. This is also great for terrarium use.

INSTALLATION

Easy to install - just plug into a grounded power outlet and plug Lunar Link into the receptacle. Then, simply attach the Lunar Link to your aquarium canopy or internal reflector using the supplied mounting screw.

LUNAR LIGHT

Model	Color	Includes	Product Dimensions	Shipping Weight
1650	Moon White	1-Module w/2 LED & 6' Detachable Power Adapter	1.5" x 1.5" x 1"	1 lb.
