NOVA™ T5 Retrofit

A REAL NO-BRAINER

On a tight budget and tight on space? Need more light? Our Nova Retrofit is a high lumen T5 lamp design that packs a lot of lumens for a very affordable price. In fact, one 28 watt lamp produces nearly the same amount of light as a 40 watt standard-output fluorescent lamp.

SLIM THINGS DOWN

Nova Retrofit is sleek, low profile, and energy efficient with room to grow. Start with one and add a light as you go. The unique linking system comes with every Nova so adding more strips is quick and easy. Unmatched in its ease of installation, the Nova is perfect for new installations or for enhancing your existing system with 10,000k Daylight or 460nm Actinic.

NOVA
