

# DAWN. DUSK. REPEAT.

THE MOST COMPLETE 24-HOUR LIGHTING SYSTEM

HIGHEST OUTPUT OF ANY LIGHTING SYSTEM

4 LAMPS IN 2

EUROPEAN LOOK

LUNAR LIGHTS EVERY 12"

FIRST-EVER 130 WATT LAMP - 48" ORBIT EXTREME

INCLUDES DOCKING MOUNTS

PARABOLIC REFLECTOR

Welcome to Orbit, the 24-hour lighting revolution. For those who are ready, our SunPaq™ Dual Daylight and Dual Actinic come together with our Lunar Light in one sleek, fan-cooled fixture.

From 40 to 130 watts, Orbit offers the leading technologies in an integrated system that works around the clock. That's one small step to take for a gigantic leap in performance.

# ORBIT™ 24-Hour Lighting System

## EXQUISITE FEATURES

A breakthrough in aquatic lighting technology, the Orbit incorporates both daytime and nighttime lighting sources for the ultimate 24-hour lighting solution. Built-in Moon White Lunar Lights (every 12") cast a crisp moon glow for optimum nocturnal simulation and nighttime viewing. The pro-grade Orbit has all of the features that advanced hobbyists demand and their friends will marvel at.

## DUAL SUNPAQ™ ENHANCED

Industry-first breakthrough technology from Current creates the ultimate lighting spectrum by blending two color temperatures into one lamp. We incorporated a proprietary blend of phosphors from Nichia, the world's leading phosphor manufacturer. We didn't stop there - the SunPaq lamps feature the industry's only 18-Karat gold plated pins for maximum conductivity and corrosion resistance as well as Philips brand filaments. A German parabolic reflector, coupled with our revolutionary dual phosphor SunPaq lamps, produces stunning output - the highest in the industry.

## EUROPEAN DESIGN

Sleek, contoured European design, great for any application, enhances the appearance of your aquarium both inside and out. Docking mounts are included for suspension above your aquarium, making feeding convenient and completing the ultra-modern look.

## SUPERIOR DRIVING SYSTEM

High power factor electronic driving system unleashes the power of the SunPaq lamps while preserving and extending lamp life. The patented circuitry inside each ballast ensures consistent high performance and low energy consumption. A 3.15" high-CFM fan quietly cools the ballast and lamps for peak performance. Maximum thermal reduction is achieved by strategic placement of the ballast in relation to the lamps allowing the fans to perform efficiently and quietly.

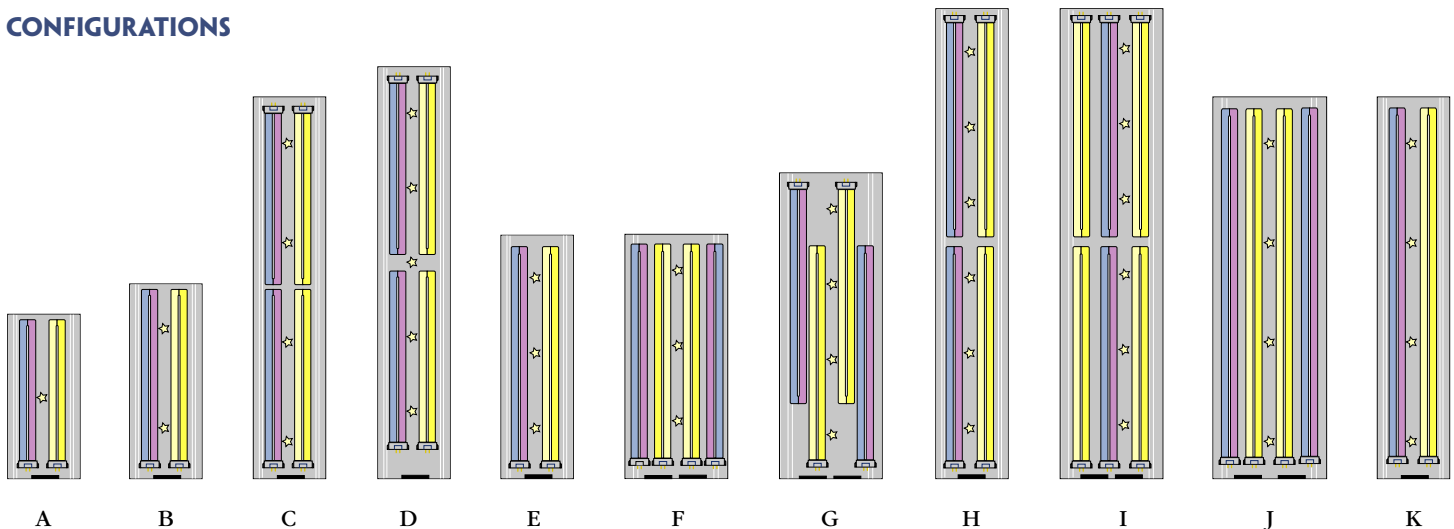

## ORBIT

Model	Length	Dual Daylight 6,700k/10,000k	Dual Actinic 420nm/460nm	Lunar Light Moon White	Independent Control	No. Fans	Product Dimensions	Total Watts	Total Amps	Config.	Shipping Weight
