

DON'T LOSE SIGHT OF REALITY.

Once you experience Outer Orbit, nothing will ever look the same! This spectacular 24-hour lighting solution combines our 10,000k PowerPaq HQI Metal Halide(s), SunPaq Dual Actinics and Moon White Lunar Lights into one sleek, integrated fixture that brings out the real colors in your reef tank.

COMPLETE 24-HOUR LIGHTING - 10,000K HQI METAL HALIDE,
DUAL ACTINIC SUNPAQS & LUNAR LIGHTS

MICROPROCESSOR BASED DRIVING SYSTEM - 15% MORE OUTPUT

ALL-IN-ONE FIXTURE - INDUSTRIES FIRST INTEGRATED
ELECTRONIC BALLAST (NO REMOTE BALLAST'S)

COOL RUNNING, ULTRA-QUIET FANS FOR
MAXIMUM THERMAL EFFICIENCY

EASY INSTALLATION - STAINLESS SUSPENSION SYSTEM
AND DOCKING MOUNTS INCLUDED

OUTER ORBIT™
The Most Complete Lighting System Available

OUTER ORBIT™ The Most Complete Lighting System

MICROPROCESSOR CONTROLLED INTERNAL DRIVING SYSTEM

The patented microprocessor controlled circuitry inside each ballast unleashes the intensity of the PowerPaq and SunPaq lamps while ensuring consistent high performance and energy efficiency. A high-CFM fan quietly cools the ballast and lamps for peak performance. Remote ballasts and too-hot-to-touch fixture housings are a thing of the past and definitely not Current.

STEROIDS FOR YOUR CORAL

The PowerPaq 10,000k Metal Halide will make your corals thrive with stunning intensity and awesome color rendition. Packed with lumens the 10,000k provides the natural shimmering effect found on coral reefs. Coupled with the highly efficient electronic driving system the 10,000k Daylight PowerPaq produces more lumens per watt than any comparable lamp or fixture.

THE BEST OF BOTH WORLDS

Enhancing the 10,000k Daylight are the revolutionary Dual Actinic Lamps providing both 460nm and 420nm Actinic in one lamp. Emitting the necessary energy for activating photosynthesis in chlorophyll A and C, the Dual Actinic provides the most complete actinic lighting spectrum available.

NIGHT TIME IS THE RIGHT TIME

Completing the 24-hour lighting cycle are the Moon White Lunar Lights casting a natural moon glow over your aquarium, creating the perfect environment for viewing nocturnal habits and stimulating spawning.

A TRULY COMPLETE LIGHTING SYSTEM

Polished German parabolic reflectors pump up the light output while the splash lenses protect the lamps and fixture from corrosion. Sleek hanging stainless hardware and docking mounts included. Independent 6 ft. power cords allow independent control of the Dual Actinics, PowerPaq HQI Metal Halides and Moon White Lunar Lights.

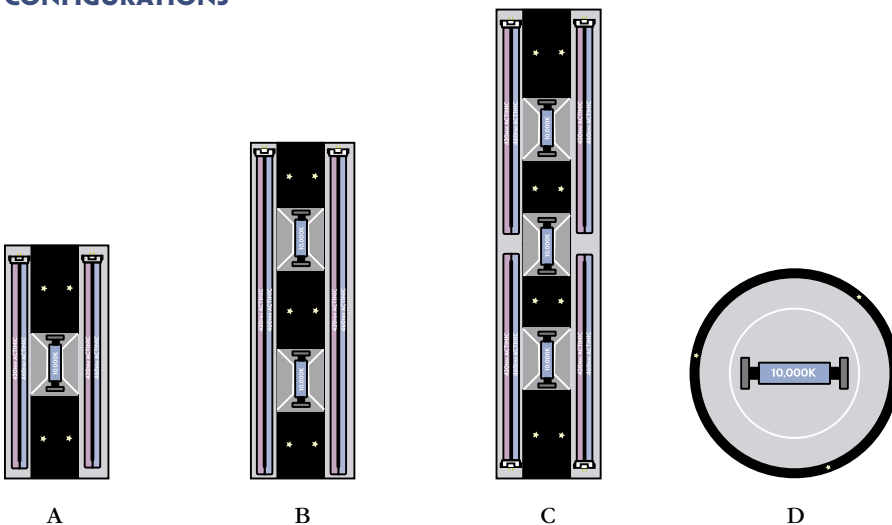

PENDANT

The Outer Orbit Pendant includes a single 10,000k HQI lamp, internal reflector, retractable hanging bracket, 16 ft. lamp cord and remote electronic ballast assembly with quick disconnect. It also features Moon White Lunar Lights along the rim.
