

# PUSH THE LIMITS

- High intensity PowerPaq HQI metal halide lighting - available in both 150 watt & 250 watt
- Microprocessor based driving system - 15% more light output\*\*
- SlimPaq T5HO Enhanced with high lumen output lamps
- LED Panels provide both blue & white lunar lighting

- **SCREAMING PERFORMANCE** – The PowerPaq 10,000K HQI metal halide will make your corals thrive with stunning intensity and awesome color rendition. Packed with lumens, the 10,000K provides the natural shimmering effect found on coral reefs. Coupled with a highly efficient electronic driving system and SlimPaq Actinic T5 High Output lamps, the Outer Orbit HQI produces more lumens per watt than any comparable lamp or fixture - hands up!

- **LEAPING ILLUMINATION**

– Powered by an advanced electronic driving system, the high output T5 SlimPaq lamps are driven to their maximum potential while ensuring long lamp life. The patented circuitry inside each ballast ensures consistent high performance and low energy consumption while meeting FCC standards with EMI protection and low THD. All components are the highest quality available, meeting ISO 9001 standards, and are potted to reduce thermal stress and increase ballast life expectancy. A German parabolic Powerwrap reflector increases light output up to 99% and surrounds each T5HO lamp for maximum light output. Integrated fan cools both ballast and lamps for efficient operation.

Powerwrap Reflector

- **PANELIT** – Features both blue and white Lunar lights mounted on a removable LED panel. Each color is independently controlled - allowing you to use both colors for a gradual ramp up, or one color for nocturnal viewing.

LED Panel

- **WHATS INCLUDED** – Each Outer Orbit HQI/T5HO fixture features PowerPaq 10,000K HQI lamp(s), SlimPaq T5HO Actinic 420nm & 460nm lamps, cooling fan, glass lens, German parabolic Powerwrap & hammertone reflectors, docking mounts, hanging kit and automatic timers.

\* Note: 150 watt models feature internal electronic metal halide driving system, \*\* 250 watt models feature remote driving systems.
